# CASH CENTER

**GeWeTe**  
cash handling technology

## The Cash Center system

At first glance, one notices the clear and compact design of the new GeWeTe money changer. The 15-inch touch-display and the acceptance components (chip card reader, banknote acceptor, and coin validator) arranged at the same height are remarkable. Optimum user guidance by means of a graphic interface coupled with perfect function as well as the possibility of constant upgrades for the product in order to fulfill the requirements of tomorrow, this is the heart of the Cash Center system!

### High-Tech changer

Cash Center, the money changer for a new generation:

- Modularity in hardware and software
- Equipped with high-quality components
- Remote monitoring and adjustment capabilities

As a result, the Cash Center is the ultimate system for absolutely secure "money changing" in all directions and fulfils all requirements of the central cash management inside a modern arcade or a casino, for example, or at any other location.

### Touchscreen technology

The Cash Center is easy and intuitive to use due to a 15-inch touchscreen. Touching the interface is sufficient and the system starts dispensing the selected coins, banknotes, or tokens. Once or numerous times.

Each type of use has its own operating area.

From the normal operating area for the "money changing" function, one can use special chip cards to manage money accounts, to reach service functions, customer commitment functions, and time recording.

The following table shows the current functions, as well as the call-up authorizations for the three stored groups of people. The scope of functions will naturally continue to grow in the coming years!

Functions	Customers	On-site personnel	Technicians
Changing	✓	✓	✓
Bonus winnings	✓		
Local money account		✓	✓
Time recording		✓	
Create customer card		✓	
Settings		sometimes	✓
Statistics		sometimes	✓
Database access			✓
Data call-up and remote adjustment			✓

### Modern PC and databank technology

The software of the Cash Center runs on a high-quality PC-unit. This makes technological upgrades and use of the PC-standards possible.

A participant can be saved in the database of the system for each type of application. Customers, the on-site personnel, and technicians receive differing access rights. Individual adaptation of the settings are possible. Each transaction, each access is recorded by the system and can be exported to an Excel® compatible file which means that the evaluation process knows no bounds!

Access to the data highway is included, because numerous readouts and settings can be made on the Cash Center and local money accounts can be managed. Extensive statistics overviews can be viewed and often printed directly on-site. And all of this is naturally also possible remotely - all you need is an Internet browser and a means of dialing into the Cash Center.

"From practical applications for practical applications" is the motto for failure security: If the PC fails, the essential functions of "money changing" can still be guaranteed by simply switching a key-operated switch!

### The modular design

- Large 15inch LC display with touchscreen for optimum operation
- Choose your banknote acceptor  
JCM EBA 30, JCM UBA 10, or Mars Sodeco BNA 56 with 1.000 banknote cashbox
- Coin validator NRI G40 with resorting  
Choose between 2x, 3x, or 4x resorting

Resorting Cash Center	Hopper 1	Hopper 2*	Hopper 3	Hopper 4	Coin cashbox
2x	big extension		✓	big extension	✓
3x	big extension	✓	✓	big extension	✓
3x	big extension		✓	✓	✓
4x	big extension	✓	✓	✓	✓

\* Hopper 2 cannot be used if the Mars Sodeco BNA 56 are installed.  
As a result, no resorting via Hopper 2 is possible!

- Extremely high coin capacity  
2, 3, or 4 hoppers for dispensing coins or tokens;  
Often with very large top units that make a max. coin capacity of up to 30.000 € possible
- All hoppers on a retractable drawer  
Simple, service and maintenance friendly
- 1.000 banknote dispensing unit  
Guarantees high security during dispensing
- Chip card reader  
For the identification of customers, on-site personnel, and technicians
- Printer with automatic cutter  
For account receipts and statistics printouts
- A dispensing tray for everything  
Banknotes, coins, receipts, and vouchers
